Semarang, Jawa Tengah

Informatics Engineering graduate from Universitas Dian Nuswantoro with a strong background in Software Development, specializing in Front-End and Full-Stack Web Development. Experienced in building, developing, and maintaining web applications using modern technologies such as React.js, Next.js, TypeScript, JavaScript, and Laravel. Skilled in developing responsive user interfaces, integrating REST APIs, managing databases, and implementing scalable web solutions. Passionate about solving technical challenges, exploring new technologies, and continuously enhancing technical expertise to build efficient and user-friendly applications.

Work Experiences

PT. PLN (Persero) - **Semarang, Jawa Tengah** Nov 2025 - Oct 2026

Front-End Engineer

PT PLN (Persero) is an Indonesian state-owned company engaged in the electricity sector, covering power generation, transmission, distribution, and customer services nationwide.

- Collaborated closely with UI/UX designers to translate design specifications into responsive, user-friendly, and accessible web interfaces.
- Integrated REST APIs and streamlined asynchronous data fetching and server-state management using React Query.
- Engineered reusable, scalable UI components leveraging a modern component-based architecture with Tailwind CSS and shadcn/ui.
- Implemented complex data collection forms and robust validation schemas using React Hook Form and Yup.
- Managed global application state efficiently with Zustand to power interactive components such as modals.
- Introduced multilingual support (i18n) to deliver a localized experience for diverse user bases.
- Developed comprehensive PDF generation and document processing workflows
- Integrated TinyMCE to enable seamless rich-text editing capabilities within the application.
- Maintained clean, scalable, and maintainable codebase adherence to industry best practices and coding standards.
- Resolved frontend bottlenecks through proactive debugging and cross-functional collaboration to align with technical and functional requirements

PT. Tri Nindya Utama - **Jl. H. Sa'aba No.6, Meruya Sel., Kec. Kembangan, Kota Jakarta Barat** Jul 2024 - Dec 2025

Full Stack Developer

PT. TRI NINDYA UTAMA or better known as BANGGA SOLUTIONS is a provider providing various kinds of Information Technology (IT) and business process solutions. Established in 2013, as a Software Developer, BANGGA SOLUTIONS has developed various applications, especially the Audit Management System (AMS) and Risk Management System (RMS).

- Developed and maintained enterprise web applications, including SINUSA (Investment Execution and Monitoring System) and ERIN (Risk Management System) for PT Perkebunan Nusantara (PTPN).
- Built responsive and interactive user interfaces using React.js and Bootstrap 5, including reusable components, form validation, state management, and data visualization.
- Developed backend services using Laravel, implementing RESTful APIs, business logic, authentication, authorization, and data processing to support application workflows.
- Designed and integrated RESTful APIs to enable seamless communication between frontend applications and backend services.
- Managed and maintained application databases using MySQL and Microsoft SQL Server, including database queries, relationships, and data operations.
- Implemented business features such as role-based access control, approval workflows, dashboards, reporting, and document management.
- Collaborated directly with clients and cross-functional teams to gather requirements, analyze business processes, and translate business needs into technical solutions.
- Performed application maintenance, debugging, troubleshooting, and feature enhancements to improve system functionality and reliability.

Samudera Digital Jul 2024 - Aug 2024

Freelance

- Contributing to the development of the BackEnd for features provided in the Lampung Begawi project Using Laravel
- Collaborated with 8 team members to deliver a seamless, functional UI

PT. Presentologics Dicoding Indonesia - **Jl. Batik Kumeli no 50 Bandung, Indonesia** Feb 2023 - Jun 2023

Internship

A virtual Internship program from the Kampus Merdeka, named Studi Independen Bersertifikat (MSIB) that together with skilvul provides bootcamp, one of which is a Front-End Web and Back-End developer. Learn about client-side website builders using HTML, CSS, Javascript

- Led a team of four people to manage some big, impactfull capstone project
- Worked with 4 people on a team and together made some website for capstone projects

Education Level

Universitas Dian Nuswantoro - **Semarang, Central Java, Indonesia** Aug 2020 - Mar 2024

Bachelor of Informatics Engineering, 3.77/4.00

Skills, Projects & Other Experience

- **Hard Skills**: HTML, CSS, PHP, Javascript, React JS, Next JS, Vue JS, Express JS, Nest JS, Node JS, Python, Java, Typescript, Laravel, Wordpress, SQL Server, MySQL, MongoDB, Git, Bootstrap, Golang
- **Soft Skills**: Able to Work With a Team, Time Management, Problem Solving, Critical Thinking, Adaptability, Work Ethic, Can Work Under Pressure
- **Projects** (2022): Build Merchandise E-commerce website named Official Pamungkas using HTML, CSS (Bootstrap), PHP for Web Programing subject
- **Projects** (2022): Create a User Interface design for a Restaurant Website named Dinus Resto using Figma in a team for Project Management subject
- **Projects** (2023): Create a Restaurant Catalog Website Using HTML, CSS, Javascript
- **Projects** (2023): Create a Personal Notes App Using React JS
- **Projects** (2023): Create a Film Catalog Website Using HTML, CSS, Javascript
- **Projects** (2023): Create a Sports Field Rental Website Using MERN (MongoDB, Express JS, React JS, Node JS) for capstone project
- **Achievements** (2023): Kampus Merdeka MSIB (2023) Certification
- **Achievements** (2024): Certificate of Competence Web Developer (BNSP)
- **Projects** (2024): Creating an E-commerce Website Using React JS as Front-End and Laravel as Back-End and integrated with Midtrans for student final assignments
- **Projects** (2024): Create a Polyclinic Website Using React JS as Front-End and Laravel as Back-End
- **Projects** (2024): Creating a Ticket Sales Website Offline/Online Using MERN (MongoDB, Express.JS, React.JS, Node.JS)
- **Projects** (2024): Create BackEnd for Lampung Begawi Website using Laravel (Freelance)
- **Projects** (2024): Developing a website SINUSA for investment execution and investment monitoring modules for PTPN (BUMN Company)
- **Projects** (2025): Developing an Erin website for risk management at PTPN (BUMN Company)
- **Projects** (2025): Developing a website SIMPP for assignment monitoring and reporting information at PT PLN (Persero)
- **Projects** (2026): Creating an AI Sales Page Generator Website Using Next.js as Front-End, Laravel as Back-End and integrated with Google Gemini AI to automate and optimize sales workflows
- **Projects** (2026): Creating an AI Ads Optimization Advisor Using Next.js as Front-End and Integrated with Google Gemini AI to automate and optimize advisor
- **Projects** (2026): Developing a website SIMPP (Assignment Monitoring and Reporting Information System) using Next.js as Front-End for PT PLN (Persero)
